

To whom it may concern.

I have been an xm customer for over a year now. I find the service to be great. Frankly i thought of paying for radio and news to be a little crazy but i think it was the same way we thought of cable when it was put into service.

I strongly recomend that you stay on board with sat. radio. Especially in these troubling times. It seems that with most of our capital infrastructure at risk we would want as many means of communication open.

As far as news and weather in is invauluable. When driving cross country we were able to hear national news that informed us of the bridge colaps 100 miles away enabling us to detor to denver and avoiding a mess that lasted for days. This could not be done with conventional radio.

Thank you for your considderation
